Luqman Mahmud

AI Model Evaluator | LLM and Agentic AI Testing | Senior IT Support Engineer | Azure AD, Intune, ServiceNow, SCCM

Canada

Summary

I am a Senior IT Support Engineer and AI Model Evaluator with more than six years of experience supporting enterprise users, managing endpoints and improving technical support operations. My technical background includes Microsoft Entra ID/Azure AD, Microsoft Intune, Active Directory, Microsoft 365, ServiceNow, SCCM/MECM, Nexthink, CyberArk, BeyondTrust, VPN support and ITIL-based incident management. I have supported Windows, macOS and Linux environments across corporate offices, remote teams and distributed business locations. During my assignment with Infosys supporting the AECOM account, I provided technical support to more than 5000 users, maintained a 98% customer satisfaction rating and helped reduce average ticket resolution time by 25%. I also led a Windows 10 to Windows 11 migration, mentored junior technicians and created more than 40 knowledge-base articles. I currently contribute to AI model evaluation and task design. My work includes assessing model outputs against structured rubrics, identifying factual and reasoning errors, testing agentic workflows and writing clear, evidence-based evaluations. I am interested in opportunities for Senior IT Support Engineer, IT Support Analyst, Systems Administrator, Endpoint Administrator, ServiceNow/ITSM Analyst, and AI Model Evaluator in Calgary or remotely across Canada & the USA. Core technologies: Microsoft Entra ID, Intune, Active Directory, Microsoft 365, ServiceNow, SCCM/MECM, Nexthink, CyberArk, BeyondTrust, GlobalProtect, ITIL, LLM evaluation and prompt testing.

Experience

OpenAI

AI Model Evaluator and AI Task Designer

June 2026 - Present (3 months)

Canada

- Evaluate AI-generated content and model responses using structured rubrics, identifying factual errors, reasoning gaps, tone issues and instruction-following failures.
- Write evidence-based evaluation rationales and develop rubrics for presentations, summaries, question-answering and synthesis tasks.
- Design realistic tasks that test agentic AI workflows across productivity tools and connected applications.
- Collaborate with reviewers to refine tasks and improve evaluation accuracy and consistency.

AECOM

2 years 1 month

Senior Information Technology Support Engineer

May 2024 - May 2026 (2 years 1 month)

Canada

Senior IT Support Engineer — AECOM (via Infosys)

Information Technology Support Specialist

May 2024 - March 2025 (11 months)

Canada

IT Support Specialist — AECOM (via Infosys)

Cognizant

Technical Support Specialist

October 2023 - May 2024 (8 months)

Canada

- Delivered on-site and remote field support across enterprise client environments, covering LAN/WAN connectivity, hardware installation, and software configuration.
- Executed scheduled maintenance and patching cycles using Microsoft Intune and ManageEngine, minimizing service disruption during upgrade windows.
- Resolved complex hardware, network, and software escalations in collaboration with senior engineers and client IT teams.
- Provided end-user support via phone, email, and in-person across multi-site environments, maintaining response SLAs consistently.

Sobeys

Desktop Support Specialist

September 2018 - August 2023 (5 years)

Toronto, ON

- Delivered Tier 1–2 IT support for 500+ users across Sobeys retail stores, offices, and regional support centers in a 24/7 environment.
- Managed enterprise-wide account administration using Active Directory — including password resets, user provisioning, group policy management, and network drive allocations.
- Supported POS system incidents and hardware issues across hundreds of retail locations, coordinating with vendors for hardware replacements and escalations.
- Used Remote Desktop Manager, SCCM, ConnectWise, Quick Assist, VNC, and LAN Desk to provide fast, effective remote resolution.
- Executed Incident Management processes end-to-end in the ITSM tool — from ticket creation through resolution and closure.
- Managed IT asset inventory including hardware tracking and software licensing compliance.

Extendicare

Technical Support Specialist

August 2019 - September 2021 (2 years 2 months)

Toronto, ON

- Provided technical support for healthcare staff across Extendicare facilities, supporting clinical and administrative applications in a regulated environment.
- Resolved hardware, software, and connectivity issues while maintaining strict documentation and escalation protocols.

Education

University of Calgary

Bachelor of Science - BS, Computer Science

Centennial College

Postgraduate Degree, Computer Technology/Computer Systems Technology

Seneca College

Engineer's degree, Electronic Engineering technician · (2015 - 2018)
